

UI Engineer Exercise

The aim of this exercise is to build the following component, using HTML 5 and CSS 3 (The final CSS must be compiled from SASS source files)

We have provided the following assets to help you with the build:

- The font file needed for 'Your dependable partner' and '...Oh Yes!' – **bold.ttf**
- The image of the Churchill dog in a frame – **churchill-dog.png**
- The tick image used in the list under the 'Your dependable partner' section – **tick.png**

You must use 'Arial' for the text under the 'Your dependable partner' section and the speech bubble should be built using CSS.

We are expecting the component to work in the latest version of the following browsers:

- Safari (desktop)
- Firefox (desktop)
- Microsoft Edge (desktop)
- Chrome (desktop)

...and for it to be fully responsive, therefore it should also work on:

- Safari (iPad)
- Safari (iPhone)
- Chrome (Android)

Once you've completed the test please upload the code to a github account or compress the files into a zip and provide us with a URL to download the file. We will ask you to remove the code once we have downloaded it.
